

# YOU SAID, WE DID

Thank you for sharing your feedback on student life and the course this year. Your voices were heard through us (student reps!) who attended meetings on your behalf. Here are some of the actions that have been taken!

## You said

“The deadline for Climate Change: Science and Society in Semester 1 was not scheduled appropriately.”

## We did

The Student Support team will review and adjust these deadlines for next year.

## You said

“Some deadlines fall on the same day or very close together.”

## We did

Best practices for avoiding deadline bunching will be reviewed and implemented.

## You said

“Rubrics are too generic and not helpful for specific assignments.”

## We did

Feedback has been shared with the Teaching and Learning Committee. Rubrics will be improved to ensure more clarity, relevance, and usefulness.

## You said

“Mentimeter is not always used appropriately by some students during lectures.”

## We did

The team is working to include clearer guidance on appropriate Mentimeter use in both E-Learning and IT policies.
