

REMORA Newsletter for GM clinical teams

REMORA Dashboard Reminder: Please Check During Appointments!

Reviewing the REMORA dashboard can save time within appointments

The data provide an overview of people's symptoms over time, which allows you to quickly identify times of flare, and response to interventions such as medication changes. Taking time to review the dashboard alongside patients also helps them to share information about what is important to them. It's quick and easy to do via the GMCR, by clicking on the 'MY GM CARE' tile and then going straight into the

REMORA dashboard. You can look at daily, weekly and monthly scores, and don't forget that you can change the time-frame for each reading, to allow you to look closer at periods of interest.

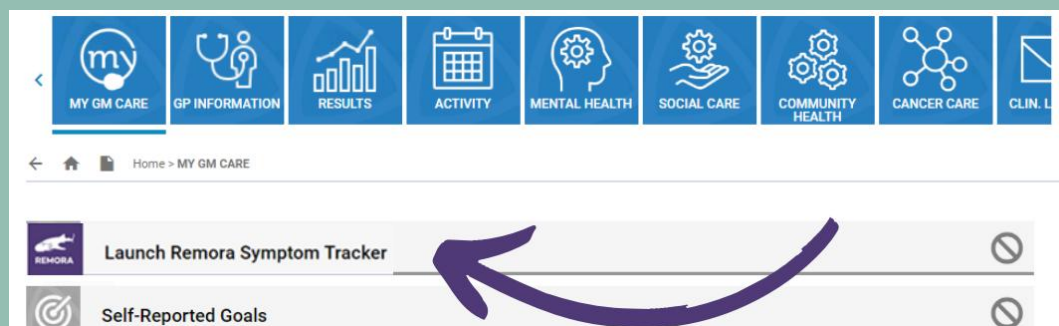

Dr Charlotte Sharp

Consultant Rheumatologist, REMORA co-investigator and site lead for Manchester University NHS Foundation Trust

*Help make REMORA data part of our everyday practice.
Patients are doing their part, let's do ours!*

Accessing the REMORA dashboard in Greater Manchester

1. Access the REMORA dashboard via your existing single sign-on into the **Greater Manchester Care Record (GMCR)**.
2. Once in the GMCR, locate the 'MY GM CARE' tile
3. The 'REMORA tile' is at the top. Click on the REMORA tile to access the dashboard

Key reminders

Don't forget to check the dashboard during every appointment with a REMORA patient!

After you've viewed the dashboard, don't forget to complete the feedback form!
Ask your research team the best way to tell you this information.
