

## MSc Audiology reading list

The following books have been suggested by staff members for pre-course/core reading.

### Introductory/background reading

- Welling, D and Ukstins, C (2013) Fundamentals of Audiology for the speech-language pathologist. Jones and Bartlett Learning.

This is a basic textbook that would be suitable for those with no prior knowledge of audiology or the auditory system. The following chapters are recommended:

- Chapter 2: Sound and Hearing
- Chapter 5: Pure Tone Audiometry and Masking
- Chapter 9: Interpretation of Audiometric Results (please note audiogram symbols are from the USA; the UK uses slightly different symbols)

### Other recommended introductory/background reading

- Tate-Maltby, M and Knight, P (2000), Audiology: An Introduction for Teachers and Other Professionals
- Taylor, G and Bishop, J (1991), Being Deaf: The Experience of Deafness, Pinter Publishers, ISBN 0861871766

### Useful core textbooks

- Katz J (2009). Handbook of Clinical Audiology (7th Ed). Lippincott, Williams & Wilkins, Philadelphia
- Galfand, S (2009) Essentials of Audiology (4th Ed). Thieme Medical Publishers, New York
- Dillon, H (2012) Hearing Aids (2nd Edition). Boomerang Press: Sydney
