# Add a link to lecture recordings

This can be done in a few ways, but for the sake of simplicity and consistency across the faculty, we'll look at adding the link to the Course Information module (part of the template).

1. First, copy the link to the lecture recordings: https://video.manchester.ac.uk/lectures
2. Now, in Canvas, navigate to the modules area. On the **Course Information** module, click the **+** on the right side of the module bar to add a new item.
3. From the drop-down menu, **select External URL.**
4. In the URL box, paste in the https://video.manchester.ac.uk/lectures link.
5. Name the link **Lecture Recordings**
6. Check the **Load in a new tab** box.
7. **Add item**. Don't forget to publish the page! ✅

paste the link here

name the link here

check the **Load in a new tab** box.
