

Year 1 BNurs Students – Semester 2 Practice Partner Update

Dear Practice Partner,

We are pleased to share an update regarding Year 1 BNurs students as they enter Semester 2 of their programme. This communication outlines the theoretical components of their academic study and how these align with practice learning expectations, including PARE proficiencies, episodes of care, medicines management, and professional values in Part 1 of the programme.

Theoretical Components

Unit	Description
Biosciences 1	Applied biosciences for nursing practice, focusing on physiological systems and their relevance to clinical care.
Collaborative Care Planning	Emphasising person-centred care, communication, and interprofessional collaboration.
Evidence-Based Practice	Introducing principles of research, critical appraisal, and application of evidence to nursing care.

Alignment with Practice Learning

Area	Details
PARE Proficiencies	Progress in Part 1 proficiencies including communication, assessment, care planning, and professional behaviour.
Episodes of Care	Supervised care episodes applying bioscience knowledge and collaborative planning.
Medicines Management	Introduction to safe administration principles, pharmacology, and documentation.
Professional Values	Focus on compassion, respect, accountability, and adherence to the NMC Code.

Acknowledgement

Thank you for your continued support in supervising and assessing students. Your contribution is vital to their development as safe, effective, and compassionate practitioners.

Kind regards,
BNurs Programme Team
The University of Manchester
