

REMORA2: Final data collection reminder

As patients begin to exit the trial, this is a critical moment to capture their final DAS score

We are looking for **all four** components:

-  Tender Joint Count (TJC) 
-  Swollen Joint Count (SJC) 
-  Patient Global Assessment (PGA) 
-  CRP 

Collection of final DAS scores is important because the primary end point compares baseline with 12 months. So far, we've received **147 or 35%** final DAS scores and only two missed.

Progress to-date	
Final DAS scores received	147
Final appointment dates provided	163
Final appointments to be confirmed (TBC)	110
Final scores confirmed missed	2

A huge thank you to everyone for your continued efforts, your contributions are vital to the success of REMORA2!

REMORA Dashboard Reminder: Please Check During Appointments

REMORA data visualisations

How did you review the data for this patient? (tick all that apply)

Not Applicable – patient in Standard of Care group	<input type="checkbox"/>
Before the appointment	<input type="checkbox"/>
During the appointment, <u>as part of discussions with</u> the patient	<input type="checkbox"/>
During the appointment, <u>without discussing it with</u> the patient	<input type="checkbox"/>
After the appointment	<input type="checkbox"/>
N/A – forgot to attempt data access	<input type="checkbox"/>
N/A – did not have time to attempt data access	<input type="checkbox"/>
N/A – data not available (patient does not seem to be tracking)*	<input type="checkbox"/>
N/A – data not available (technical issues)*	<input type="checkbox"/>

How helpful was the REMORA data for this consultation? (tick one response)

Please use the below free text box to explain why you did/did not find the REMORA data helpful.

- Extremely helpful
- Somewhat helpful
- Neither helpful / unhelpful
- Somewhat unhelpful
- Extremely unhelpful
