

## Learning from NHS trusts to support data collection

### 1. Identify staff who died by suicide

#### Trusts have told us they have used

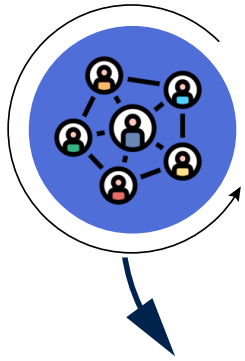

- death in service record,
- rostering and leave system,
- Health & wellbeing team,
- employee staff records,
- incident reporting (e.g. Datix)

### 2. Collate information about staff who died

#### Trust contact will combine knowledge from

- Employee Relations team,
- Staff Psychological Support Service (SPSS)
- Line managers
- Health & Wellbeing Team

### 3. Report detail to deidentified data collection

Information about NHS staff who died by suicide provided to NCISH via an online questionnaire

### Align this data collection with staff support

Staff wellbeing services to offer support to affected teams via line managers

Support from a trained counsellor/therapist to be available at a time that suits affected colleagues
