

Giving Effective Presentations

Activity 2: Know your audience!

Prepare a short verbal explanation about water cycle OR photosynthesis. You will be given one of the following audiences to present to:

- A) Students from your year studying a range of subjects
- B) Students all in Year 8
- C) Family members of yourself and your peers (for instance other members of your EP group)

Carefully consider key things that you need to be aware of with respect to each audience, for instance family members may include parents and young children. What information you should include or exclude? What words or format would be the most appropriate means of communicating? What messages should be emphasized?
